

## Opportunités d'affaires Juin 2018

### **BRIT20180321001**

#### **Agroalimentaire**

Une cave basée à Palerme (Sicile), est à la recherche de petits et moyens producteurs de boissons alcoolisées avec une expérience dans la vente de vin, pour élargir sa gamme de produits. Cette société recherche des partenaires basés dans toute l'UE.

### **BRNL20180410001**

#### **Loisirs-sport**

Un distributeur néerlandais spécialisé dans le secteur des produits de sports de plein air veut élargir sa gamme et recherche des produits innovants de qualité, les vêtements étant exclus.

### **BRUK20180427001**

#### **travaux – métaux**

Un fabricant britannique d'abris métalliques sécurisées pour l'extérieur recherche un partenaire de production.

### **BRTR20180327001**

#### **Médical**

Une société turque fournissant des solutions innovantes aux hôpitaux recherche des fournisseurs de dispositifs de coagulation et d'ablation certifiés CE pour la chirurgie générale, les greffes du foie, la chirurgie cérébrale et cardiovasculaire. Les fonctions requises comprennent les options de coupe monopolaire et bipolaire, de coagulation et de cautérisation.

## **BRUK20180418001**

### **Agriculture**

Une société basée au Royaume-Uni spécialisée dans le commerce de produits agricoles recherche des fournisseurs de graines de tournesol et de tourteau de tournesol de qualité

## **BRPL20180413002**

### **Luminaires**

Une entreprise polonaise est spécialisée dans la production de lampes LED innovantes pour les restaurants, les gares routières, les bars et autres espaces publics. La société est à la recherche d'un fabricant ou fournisseur de profilés en aluminium spécifiques et de lampes à led.

## **BRAM20180504001**

### **Agroalimentaire**

Une entreprise arménienne qui importe des produits est à la recherche de fournisseurs de viande congelée (bœuf, porc, volaille), de pâtes et de céréales.

## **BRDE20180504001**

### **Médical**

Un physiothérapeute allemand est à la recherche d'un producteur de boue de tourbe.

## **BRPL20180410001**

### **Décoration**

Une entreprise polonaise est spécialisée dans la vente de produits d'éclairage intérieur, de produits de décoration et de meubles de haute qualité. Elle recherche des producteurs, des fabricants et des designers

## **BRTR20180516001**

### **Plastique**

Une entreprise turque recherche des fabricants de granulés de plastique pour la fabrication de sacs en plastique

.

## **R&D et Innovation :**

## **RDUK20180411002**

### **Fuel delivery systems- Ceramic materials**

UK London based SME is developing uncooled internal combustion engines (ICEs) for all hybrid applications and fuels, including hydrogen. The piston/cylinder assembly is being manufactured from structural ceramics. Around one third of fuel energy is currently dissipated in cooling systems - this waste is eliminated. Partners are sought with experience in fuel delivery systems, ceramic materials, turbocharging and exhaust energy recovery for an application to Innovate UK Open Round 5 or 6.

## **RDES20180510001**

### **H2020: Experts in Next Generation Sequencing, genomics, ethics and data protection**

A Spanish public hospital is looking for partners for submitting a proposal to the call H2020-SC1-BHC-10-2019: Innovation Procurement: Next Generation Sequencing (NGS) for routine diagnosis.

Public procurers and experts in NGS, genomics, ethics and data protection in the field of haematology and oncology are sought for developing personalised medicine solutions and scale-up demand driven innovation for healthcare systems.

## **RDUK20180611001**

### **H2020: Smart personalised medicine**

A UK-based consortium is looking to develop a system to enable the elderly to live more independently. The innovation core to the proposal is an AI assisted personalised interface for mobile devices using learning systems, update and or change installed apps to optimise the coaching of individuals. The consortium is looking for partners, industrial and academic, who have been involved in projects around the theme of healthy living at home, to strengthen a core consortium for a proposal to H2020.

## **TRQA20180228001**

### **Chemical disinfectants**

A Qatari company specialized in production of chemical disinfectants (sodium hypochlorite) is looking for a partner that can supply additional technology to expand current production lines through a joint venture agreement and assist in management of production facility in Qatar.

## **TOUK20180504001**

### **Frictionless braking system**

A UK product development company has developed a novel frictionless hydraulic braking system with kinetic energy recovery. Unlike conventional braking systems it does not introduce particulates into the environment like copper, cast-iron and brake pad material into the air which are major health hazard worldwide. The company is looking to cooperate with engineering and equipment manufacture companies for final development and commercialization via license or technical cooperation.

## **TRBE20180508001**

### **Smart radiator valves- printed circuit boards**

A Brussels based company operating since 2015 develops smart programmable radiator valves and is looking for a technical partner to improve production volume. The partner sought is a company with experience in manufacturing of electronic printed circuit boards (PCB) as original equipment manufacturer (OEM). The company would like to develop collaboration under a manufacturing agreement or a technical collaboration agreement.

## **TOUK20180601001**

### **Self-repairing industrial robot system**

A UK SME has developed a self-repairing industrial robot system using a patented novel method which eliminates planned and unplanned downtime and system failures. They are now seeking technical partners to further develop the innovation, via technical cooperation agreement, to a proof of concept stage but they are also open to license agreements.

## **TRDE20180530001**

### **Chemical industry know-how**

A German start-up company set up a digital marketplace combining suppliers and purchasers of different branches and sizes on one intuitive platform for raw materials. The platform is completely independent from chemicals producers and traders. In order to introduce new services and features and to further develop the platform, partners with know-how, experience and contacts in the chemical industry are sought for technical co-operation agreements.

## **TOUK20180508004**

### **Autonomous mobile robots for intra-logistics transport**

The company is a UK based SME developing autonomous mobile robots for intra-logistics material transport. It is developing self-driving material transport vehicles that can be incorporated into companies' warehouses effortlessly. The company is currently engaged in on-site validation trials and is seeking collaborative European partners to develop key technological capabilities and validate the system over a larger pool of user-cases, under a technical cooperation agreement.

## **TOIT20180215001**

### **Platform for services to people with disabilities**

An Italian company has developed a novel software platform and app targeting people with disabilities, to ease their daily actions, services, and interactions with common activities. The company is interested in finding partners for jointly market the solution to potential industries through financial agreements, or commercial agreements with technical assistance, or technical cooperation agreements.

## **TRNL20180531001**

### **Treatment of solid tumours by innovative nanoparticles**

A Dutch clinical stage company is developing a new generation of nanomedicines. Their aim is to use their nanoparticle technology to improve the efficacy and safety profiles of current and novel drugs for the treatment of solid tumours. As part of their development strategy, they are looking for a license and/or technical cooperation agreement with academic research labs to exploit their nanoparticles for enhanced tumour targeting of new oligonucleotides with therapeutic potential.

## **TOIT20170511002**

### **New intercooler approach for internal combustion engines**

An Italian expert in refrigeration equipment has developed and patented a new approach for integrating an intercooler system in turbocharged engines, with advantages over current state of the art. Technical cooperation and license agreements are searched with enterprises in the automotive sector or chilling/air-conditioning sector for carrying out a more thorough analysis on prototypes, evaluate market potential, explore possible licensing.
